

CLIFTON RANGER DISTRICT
APACHE/SITGREAVES NATIONAL FOREST'S
ANNUAL OPERATING INSTRUCTIONS (AOI)

Baseline Horsesprings Allotment
2012

I. PERMITTED USE:

The following table illustrates the number of livestock and period of use permitted on the BASELINE HORSESPRING Allotment as per Term Grazing Permits 030103-003 issued to [REDACTED] on March 8, 2010.

KIND	CLASS	TERM PERMIT		PERMITTED PERIOD OF USE
		Numbers	AUMs	
Cattle	Cow/Calf	0-100		09/01 – 5/31
	Yearling	190-405		
	Bull			
Horses	Mature			
	Total		3,019	

II. ACTUAL USE:

The following numbers and classes of livestock are authorized to graze on the Baseline Horsesprings Allotment this year. The authorized number of livestock, AUM's, and period of use is hereby modified according to the following table.

KIND	CLASS	AUTHORIZED by AOI		PROPOSED PERIOD OF USE
		Numbers	Annual AUMs	
Cattle	Cow/Calf	34	539	2/29 – 3/1
	Yearling	3	26	2/29 – 3/1
	Bull	1	18	2/29 – 3/1
	Mature Cows	2	12	2/29 – 3/1
Horses	Mature	4	58	2/29 – 3/1
	Total	44	653	

III. GRAZING MANAGEMENT PROPOSED ROTATION SCHEDULE:

Actual dates may vary dependent upon climatic conditions, wildfire, noxious weeds, soil and range conditions, conflicts with or for protection of wildlife, water developments and when utilization levels are reached and time required moving livestock. The total number of livestock listed below is authorized livestock for the Baseline Horsespring Allotment.

Pasture	Proposed Number	Proposed Season of Use
Cemetery	44	2/29 – 4/1
School House/Private	44	4/2 – 5/1
South Water Loop	44	5/1 – 7/1
South Bear Canyon	44	7/2 – 9/1
Eagle	44	9/2 – 11/2
Clay Canyon	44	11/3 – 11/6
Bear Canyon Trap	44	11/7 – 11/10
East	44	11/29 – 2/28
North Bear Canyon, Black Mountain, North Water Loop	Rest	Rest

Actual dates for season of use may vary dependant upon climate conditions and when utilization levels are reached.

IV. ALLOWABLE USE STANDARDS

Allowable use of forage is based on the amount and kind of forage on the allotment, plant needs, range condition, trend, and grazing management strategy. Duration, frequency, and timing may be manipulated within the grazing schedule to meet allowable use standards.

The allowable use levels for this allotment are established for key areas and key species by pasture for the time period livestock are in a pasture. The use on key species in key areas will ultimately determine the length of the grazing period in each pasture. The establishment of the utilization standards is consistent with 36 CFR 222 regulations, FSM 2210 and 2230, and FSH 2209.21.

For simplicity, key areas are generally considered as follows: 1) full capacity rangeland located on ridgetops/mesas within a 1/4 mile from available water sources; 2) canyon bottoms/riparian areas with free flowing water or springs regardless of distance from water; 3) any area containing full capacity range with erosive soils and insufficient/marginal ground cover to protect the soil; or 4) areas containing habitat, whether occupied, suitable and unoccupied, or potentially suitable habitat, for threatened, endangered, or proposed species that are of concern to the Forest Service.

Key areas may be designated in cooperation with the Forest Service and the permittee.

The Baseline/Horsesprings AMP outlines the allowable forage use during the dormant season (9/1 – 5/30). The following table illustrates this use and the maximum allowable use during the growing season (5/31 – 8/31).

Allowable Use

Range Condition Site	Dormant Season Use 9/1 to 5/30	Growing Season Use 5/31 to 8/31
Very Poor	15%	15%
Poor	20%	20%
Fair	40%	30%
Good	45%	35%
Excellent	45%	35%

V. ADMINISTRATION

1. The permittee will record actual use as it occurs; including livestock numbers and dates your permitted livestock are in a pasture. This information will be reported at the next annual validation meeting.
2. Any change or deviation from this Annual Operating Instructions is to be coordinated and confirmed in advance with the District. If emergency conditions require making a change immediately, the permittee will notify the District as soon as practical.
3. Livestock remaining in pastures beyond the specified rotation date, that are allowed to drift between pastures, or grazing in rested pastures may be considered a violation of your Term Grazing Permit.
4. Livestock should be moved when forage utilization objectives have been met or within 1 week of planned rotation dates, unless changes have been confirmed with District Range personnel.
5. The District may spot check range improvements before the entry date to insure improvements are in a satisfactory condition. Livestock will not be allowed to enter pastures if assigned improvements are not maintained to proper standards. Livestock are not allowed to enter pastures if fences will not keep livestock where they are placed

VI. SALT AND MINERAL BLOCK

Typically, salt or mineral blocks are not to be placed within a quarter mile of water or drainage bottoms. Salt may be placed closer than a quarter of a mile to water for treatment purposes. If salt is placed less than a quarter mile from water, it will be moved every day or within 4 days at the most to a new location no matter where the salt is placed. Salt will be used to attract cattle to areas of a pasture typically not utilized and or for soil/range condition treatment purposes. Blocks may be removed by the District if found near water, over-utilized areas, meadow bottoms or roads. Blocks should be placed in a way that does not encourage erosion but treats the soil to upgrade it from the present condition.

VII. MONITORING

Monitoring and evaluation is an essential aspect of good rangeland management. Monitoring and evaluation can be described as the gathering of information so the manager knows what is happening to rangeland resources and why. The intent of monitoring and evaluation is to test the success of the management strategy and if needed, make adjustments. The following types of monitoring can be collected and will be used by the Forest Service for management decisions.

- 1. Forage Production
- 2. Forage Utilization
- 3. Photo Points
- 4. Condition of Improvements
- 5. Actual Use
- 6. Grazing Response Index
- 7. Precipitation.

VIII. RANGE IMPROVEMENT CONSTRUCTION / MAINTENANCE

The permittee will maintain all range improvements that are assigned for maintenance on pages 11 – 14 of the Term Grazing Permit. When improvements are completed the permittee will inform District Range personnel to schedule an inspection. Before using machinery to clean any pond, the permittee is required to give the District Office at least 45 days advance notice so that the tank can be inspected for threatened or endangered species. All work involving the use of heavy equipment will be accomplished only after prior approval of the District Ranger.

Current Year Improvement Scheduled		YEAR	2012
Improvement Type / ID #	Completion Date	Description/Comments	Status Done /Date
	Year Long	Routine maintenance as assigned on your permit	
Clay Canyon Trough	2012	Move 200 yards to the North	
Eagle/Bee Canyon Fence	2012	Add 5 th wire (Check with Wildlife)	
Summit Spring Trick Tank	2012	Completely Repair	
Black Mountain Pipeline	2012	Move Pipeline ~ ½ mile	
Sunflower/Eagle Unit	2012	Move Pipeline ~ ¼ mile	

IX. PROTECTION

The permittee, his agents and employees, when acting within the scope of their employment, and his contractors and subcontractors will protect the land and property of the United States, waived private land and other land under jurisdiction of the Forest Service covered by and used in conjunction with this permit. Protection will include taking all reasonable precautions to prevent, make diligent efforts to suppress and report promptly all fires on or endangering such land and property. During periods of high fire danger, branding fires will be allowed by permit only.

X. ALLOTMENT INSPECTIONS

Forest personnel may conduct periodic brief inspections of pastures within the allotment at any time to verify actual use, improvement conditions, or other non-range related activity. The permittee will be notified and invited to participate on extended (3-5 days) inspections.

XI. PERMIT CONDITIONS

This Annual Operating Instructions is hereby made a part of the Term Grazing Permit as provided for in Part 2, Section 8(a). It complies with the standards and guidelines found in the Forest Plan.

Failure to comply with any of the terms and conditions specified in Parts 1, 2, and 3 of your Term Grazing Permit may result in suspension or cancellation, in whole or in part, after written notice. This is found in Part 1, Section 3, of your permit.

This decision is subject to administrative review, pursuant to 36 CFR 251; and any appeal of this decision must be fully consistent with 36 CFR 251.90. In accordance with 36 CFR 251.84, if you file an appeal, I am willing to meet with you to discuss any concerns you may have with my decision. If you file an appeal, you may request an oral presentation in the appeal or at any time prior to closing of the appeal record (36 CFR 251.97). Additionally, if you file an appeal, you may request a stay of my decision in the appeal or at any time prior to closing of the appeal record (36 CFR 251.91).

A notice of appeal must be filed with Chris Knopp, Forest Supervisor, Apache-Sitgreaves National Forest's, P.O. Box 640, Springerville, AZ 85938 within 45 days of the date of this decision. A copy of the notice of appeal must be filed simultaneously with Carol Telles District Ranger, Clifton Ranger District, 397240 AZ 75, Duncan, AZ 85534.
