Walnut Allotment

(b) (6)

Dear (b) (6)

The following are your 2014 annual operating instructions (AOI) for the Walnut grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

Authorized Use

The following table describes authorized livestock numbers per grazing unit, anticipated use dates, and proposed monitoring dates. Please request a change in this schedule well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Grazing Unit	Dates of Use	Monitoring Date	Authorized Livestock	Rationale/Comments
Juniper	January 1 st February 15 th	February 14 th	48 Cows 3 Bulls 34 Yearlings	
Rocky Dublin	February 16 th March 29 th	March 28 th	48 Cows 3 Bulls 34 Yearlings	
Lann	March 30 th April 26 th	April 25 th	48 Cows 3 Bulls 34 Yearlings	Any cattle kept after May 31 st will need to be billed as cows.
Cottonwood/Haystack	April 17 th July 19 th	July 18 th	48 Cows 3 Bulls	Use pastures together due to lack of water in Haystack
Edward Spring	July 20 th October 25 th	October 24 th	48 Cows 3 Bulls	
Walnut	October 26 th December 13 th	December 12 th	48 Cows 3 Bulls	
Juniper	December 14 th January 31 st	January 30 th	48 Cows 3 Bulls	

Monitoring:

Upland utilization is measured at the end of the growing season in key areas for key forage species. This information, along with vegetation condition, forage plant production and vigor, soil and watershed condition, will be used to make informed management recommendations concerning pasture moves and stocking rates.

Riparian utilization in key reaches is measured during growing season to verify residual vegetation is present for streambank protection during flow events.

Grazing intensity will be evaluated during the growing season to make necessary changes needed for plant development and recovery.

Vegetative Use Guidelines:

Grazing will be managed so conservative use levels are achieved over the long-term in pasture key areas. It is your responsibility as permittee to take action so that livestock grazing does not exceed vegetative use thresholds. Please arrange for an allotment inspection if seasonal vegetative use of available forage approaches these thresholds.

Vegetation	Use Threshold
Upland herbaceous species	30-40% of current year's growth
Upland browse species	50% of current year's growth
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall
Streambanks (if applicable)	Limited to less than 20% alteration of alterable streambanks
Mexican Spotted Owl PAC's (where applicable)	20% optimum-40% maximum
Annual Grasses	50% of current year's growth

Range Improvement Maintenance:

All range improvements must be maintained to Forest Service standards before cattle will be allowed to enter the units. You must receive verbal concurrence for each project before work can begin except routine maintenance (e.g. cleaning dirt tanks, maintaining fence, restoring pipe). It is your responsibility to be aware of and comply with fire restriction.

The following table describes 2014 authorized range improvement projects.

Pasture	Location	Description of Work	Clearances Needed
Lann Pasture	Cottonwood Water System	Connect existing trough to existing pipeline	Existing improvement, coordinate with District
Cottonwood	Cottonwood Stock	Clean existing stock	Contact district prior

	Tank	tank	to cleaning tank
Juniper Canyon	Tank #3935	Clean out existing stock tank	Archeological clearance needed for walking dozer in.
Haystack	Lower Haystack Tank	Clean out existing stock tank	Existing improvement, coordinate with District
Rocky Dublin	FS Road 71 Corral	Replace torn down corral	Part of current EA, needs Archeological Clearance
<i>*Planned projects are listed in a current Environmental Assessment for the Allotment and may be implemented based on the impending NEPA decision.</i>			

Salting:

In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

Supplements and Attractants

Protein blocks, nutritional supplement, and other attractant may be authorized.

Supplemental Feeding:

No supplemental feeding is authorized.

Weeds

Invasive plants threaten ecosystem health and grazing resources. Please assist us in preventing the introduction and spread of invasive plants.

If you have any questions, please contact Eric Hoskins, Range Management Specialist, at (928) 467-3236.

Sincerely,

KELLY L. JARDINE
District Ranger
