NEED STATEMENT – PROBLEM ANALYSIS:

This project will clean out and repair twelve existing dirt tanks and will construct four new dirt tanks. The preexisting tanks are silted in and the berms of some are breached. As a result, the tanks either do not hold water or do not hold as much water as they should. Cleaning out and repairing these tanks, in addition to constructing the four new tanks, will provide vital water to the numerous elk, deer, and other wildlife that frequent this area.

PROJECT OBJECTIVES:

The objective of this project is to clean, repair, and construct dirt tanks to provide perennial water for wildlife.

PROJECT DESCRIPTION AND STRATEGIES:

This project will clean out and repair twelve existing dirt tanks: Leaky, Juniper, Fresno, Breadpan, Pasture, Blackjack, Duck, Gun, Round, and three unnamed tanks. The preexisting tanks are silted in and the berms of some are breached. These old tanks will be excavated and will have the berms rebuilt. Some of the tanks do not hold water well and will be given new liners. In addition to cleaning and repairing existing tanks, this project will construct four new dirt tanks to provide additional water sources.
