Re: Public Records Request

Dear Mr. Burgess:

Pursuant to your request for Landowner Relations Program (LRP) project applications/descriptions and dollar amounts awarded, the Department is providing you a table with the nine projects you have identified. Projects from the timeframe you are requesting were proposed through and stored in an online database so there are no project proposal documents. The table is an export from that database that contains the fields for project name, project description and funding requested. Please note that requested amount is the same as the awarded amount.

If you have any questions or require further assistance, please contact Don Larsen, Landowner Relations and Habitat Enhancement Program Manager at (623) 236-7624.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim deVos".

Jim deVos, Assistant Director
Wildlife Management Division

To Whom It May Concern,

This is a Public Records Request, as per A.R.S. 39-121.01.

Your agency's website includes a Big Game Donation Fund page:
<https://www.azgfd.com/wildlife/landowners/big-game-donation/>

This page list Landowner Relations Program (LRP) projects that were funded from 2019 through 2017.

Please send me the project applications/descriptions, including the dollar amounts awarded, for the following LRP projects listed on the web page:

2019 - Partnered with a rancher in GMU 22 to convert an existing well to solar, add a new drinker location, and increase storage to provide a more reliable water source for deer.

2019 - Partnered with a rancher in GMU 24A to install 2 miles of new pipeline, additional storage, and an additional drinker to an existing well.

2019 - Partnered with a rancher in GMU 23 to add 1.25 miles of new pipeline, additional storage, and additional drinkers to an existing well.

2019 - Partnered with a rancher in GMU 23 to install 3.5 miles of new pipeline, additional storage, and 3 new drinkers to an existing well.

2018 - Partnered with a rancher in GMU 24A to clean and repair 13 existing dirt tanks to provide more reliable water for deer and small game.

2018 - Partnering with the Forest Service in GMU 35A to restore over 3,000 acres of grassland habitat to benefit a variety of big game and small game species.

2017 - Partnered with a rancher in GMU 23 to covert an existing well to solar providing reliable year-round water for mule deer and small game.

2017 - Partnered with a rancher and the Forest Service in GMU 35A to redrill an existing well to provide reliable year-round water for mule deer

Furthermore, the minutes from the January 12, 2019, meeting of the Landowner-Lessee/Sportsman Relations Committee (LLSRC) mention a \$30,000 LRP grant for the 51 Ranch in Game Unit 21 to build new livestock waters with the help of the AZ Mule Deer Organization. This project is not listed on the web page, but please send me a copy of that project's application/description too.

I do not intend to use this information for commercial purposes.

For the sake of convenience, you may email me this information.

Thank you.

Jeff Burgess
