Dagger Allotment

(b) (6)

Dear (b) (6):

The following are your 2016 annual operating instructions (AOI) for the Dagger grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

Authorized Use

The following table describes authorized livestock numbers per grazing unit, anticipated use dates, and proposed monitoring dates. Please request a change in this schedule well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Grazing Unit	Dates of Use	Monitoring Date	Authorized Livestock	Rationale/Comments
North Sheep	March 1 st May 1 st	April 29 th	165 Cow/calf 13 Bulls 25 Yearlings	
Upper Coon Creek	May 1 st June 15 th	June 17 th	165 Cow/calf 13 Bulls	
Oak Creek Mesa	June 15 th October 1 st	September 30 th	165 Cow/calf 13 Bulls	Cattle will be actively managed. They must remain south of the upper bluffs.
Upper Dry Creek	October 1 st November 1 st	November 4 th	165 Cow/calf 13 Bulls	
Rock and Ellison	November 1 st December 31 st	December 30 th	165 Cow/calf 13 Bulls	

Monitoring:

Upland utilization is measured at the end of the growing season in key areas for key forage species. This information, along with vegetation condition, forage plant production and vigor, soil and watershed condition, will be used to make informed management recommendations concerning pasture moves and stocking rates.

Riparian utilization in key reaches is measured during growing season to verify residual vegetation is present for streambank protection during flow events.

Grazing intensity will be evaluated during the growing season to make necessary changes needed for plant development and recovery.

Vegetative Use Guidelines:

Grazing will be managed so conservative use levels are achieved over the long-term in pasture key areas. It is your responsibility as permittee to take action so that livestock grazing does not exceed vegetative use thresholds. Please arrange for an allotment inspection if seasonal vegetative use of available forage approaches these thresholds.

Vegetation	Use Threshold
Upland herbaceous species	30-40% of current year's growth
Upland browse species	50% of current year's growth
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall
Streambanks (if applicable)	Limited to less than 20% alteration of alterable streambanks
Mexican Spotted Owl PAC's (where applicable)	20% optimum-40% maximum
Annual Grasses	50% of current year's growth

Range Improvement Maintenance:

All range improvements must be maintained to Forest Service standards before cattle will be allowed to enter the units. You must receive verbal concurrence for each project before work can begin except routine maintenance (e.g. cleaning dirt tanks, maintaining fence, restoring pipe). It is your responsibility to be aware of and comply with fire restriction.

The following table describes 2016 authorized range improvement projects.

Pasture	Location	Description of Work	Clearances Needed
Upper Coon Creek	Bull Canyon Tank	Clean out and maintain Dirt Stock Tank	Forest Service approval prior to bringing equipment onto the Forest
Upper Coon Creek	Scraper Tank	Clean out and maintain Dirt Stock Tank	Forest Service approval prior to bringing equipment onto the Forest

Salting:

In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

Supplements and Attractants

Protein blocks, nutritional supplement, and other attractant may be authorized.

Supplemental Feeding:

No supplemental feeding is authorized.

Weeds

Invasive plants threaten ecosystem health and grazing resources. Please assist us in preventing the introduction and spread of invasive plants.

If you have any questions, please contact Eric Hoskins, Rangeland Management Specialist, at (928) 467-3236.

Sincerely,

KELLY L. JARDINE
District Ranger
