Tonto Basin Allotment

(b) (6)

Dear (b) (6)

The following are your 2014 annual operating instructions (AOI) for the Tonto Basin grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

Authorized Use

The following table describes authorized livestock numbers per grazing unit, anticipated use dates, and proposed monitoring dates. Please request a change in this schedule well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Grazing Unit	Dates of Use	Monitoring Date	Authorized Livestock	Rationale/Comments
Lambing	Until - January 15 th		66 Cows 4 Bulls 44 Yearlings	
Ord	January 15 th April 15 th	April 11 th	66 Cows 4 Bulls 44 Yearlings	
South Long Mesa	April 15 th June 1 st	June 6 th	66 Cows 4 Bulls 44 Yearlings	
North Long Mesa	June 1 st August 1 st	August 1 st	66 Cows 4 Bulls	Yearlings may be kept past May 31 st a new bill must be issued.
Sycamore	August 1 st November 1 st	October 31 st	66 Cows 4 Bulls	
Mesquite	November 1 st January 31 st	January 30 th	66 Cows 4 Bulls	

Monitoring:

Upland utilization is measured at the end of the growing season in key areas for key forage species. This information, along with vegetation condition, forage plant production and vigor, soil and watershed condition, will be used to make informed management recommendations concerning pasture moves and stocking rates.

Riparian utilization in key reaches is measured during growing season to verify residual vegetation is present for streambank protection during flow events.

Grazing intensity will be evaluated during the growing season to make necessary changes needed for plant development and recovery.

Vegetative Use Guidelines:

Grazing will be managed so conservative use levels are achieved over the long-term in pasture key areas. It is your responsibility as permittee to take action so that livestock grazing does not exceed vegetative use thresholds. Please arrange for an allotment inspection if seasonal vegetative use of available forage approaches these thresholds.

Vegetation	Use Threshold
Upland herbaceous species	30-40% of current year's growth
Upland browse species	50% of current year's growth
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall
Streambanks (if applicable)	Limited to less than 20% alteration of alterable streambanks
Mexican Spotted Owl PAC's (where applicable)	20% optimum-40% maximum
Annual Grasses	50% of current year's growth

Range Improvement Maintenance:

All range improvements must be maintained to Forest Service standards before cattle will be allowed to enter the units. You must receive verbal concurrence for each project before work can begin except routine maintenance (e.g. cleaning dirt tanks, maintaining fence, restoring pipe). It is your responsibility to be aware of and comply with fire restriction.

The following table describes 2014 authorized range improvement projects.

Pasture	Location	Description of Work	Clearances Needed
Sycamore	Nook Spring	Clean out Spring, repair existing pipeline and trough.	None, existing improvement # 6212
Mount Ord	Cloudburst Spring	Clean out Spring and repair existing pipeline and trough.	None, existing improvement
Pagewire	Boundary Fence	Build boundary Fence to separate the Pagewire Pasture	Archeological and Biological and DM
Long Mesa Pasture	Corral	Build corral to replace the one lost to TRCU creation	Archeological, Biological and DM
Mount Ord	Sycamore Spring	Add Pipeline and two troughs to an existing water system	Archeological, Biological and DM

Salting:

In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

Supplements and Attractants

Protein blocks, nutritional supplement, and other attractant may be authorized.

Supplemental Feeding:

No supplemental feeding is authorized.

Weeds

Invasive plants threaten ecosystem health and grazing resources. Please assist us in preventing the introduction and spread of invasive plants.

If you have any questions, please contact Eric Hoskins, Rangeland Management Specialist, at (928) 467-3236.

Sincerely,

KELLY L. JARDINE
District Ranger
