

**2023 ANNUAL OPERATING INSTRUCTION  
SPRINGVILLE RANGER DISTRICT**

**Allotment Name:** Beehive and Sheep Springs

**Table 1. Term Permitted Livestock Numbers and dates:**

<u>Amount &amp; Type</u>	<u>Dates</u>
333 c/c	7/01-10/31 (1,347 aums)
On the sheep driveway	4/20* & 21** - 5/25* & 26**
4,000 sheep	6/01 & 02-8/18 & 19 (2,104 aums)
14 burros	6/01 & 02-8/18 & 19
2 horses	6/01 & 02-8/18 & 19
400 sheep (trucked in)	06/01-09/25 (308 aums)
On the sheep driveway	08/26* & 27** - 10/8* & 9**
On the sheep driveway	04/20-05/25
1,055 sheep	06/01-08/19 (555 aums)
On the sheep driveway	08/26-10/08
OR 139 c/c	07/01-10/31 (562 aums)

**Table 2. Annual Authorization livestock numbers and dates:**

<u>Amount &amp; Type</u>	<u>Dates</u>
700 c/c	06/01-10/31 (3,521 aums)
Sheep Driveway	Non-use

**Table 3. Pasture Rotation Schedule**

<u>Allotment/Pasture</u>	<u>Use Period*</u>	<u>Midpoint Date</u>	<u># Of Days</u>	<u>Key Species***</u>	<u>Allowable Use Guideline**</u>
Bull	6/1-6/15	6/8	15	CARE/POA/DECA/AGST/MUMO/FEAR/ POFE/BLTR/FOV/BOGR	30-40%
White Mtn. Reservoir	6/16-7/7	6/26	22		
Geneva/Ski Hill	7/8-8/4	7/22	28		
Pole Knoll	8/5-9/2	8/19	29		
Rim/Norton/Sheep Corral	9/3-10/1	9/18	29		
Lower/Monaco	10/2-10/31	10/17	30		

\* Dates will be adjusted if maximum allowable utilization levels in the stocked pastures are reached sooner than anticipated.

\*\* Key species may be adjusted as necessary to reflect those receiving the most grazing pressure based on time of the year.

\*\*\*BOGR=Blue grama, CARE=sedges, POA=bluegrass species, Fear=Arizona fescue, Deca=Tufted hairgrass, Mumo=Mountain Muhly, and Muwr=Spiked muhly, and AGST=Creeping Bentgrass.

**Utilization Monitoring:** The allowable use guideline for each pasture is shown in Table 1. Livestock grazing utilization monitoring may be conducted in key areas near the midpoint or end of the grazing period, or at the end of the growing season for each pasture. It is permittee responsibility to act so that livestock grazing does not exceed the allowable use guidelines. Proper salt placement (more than a ¼ mile from water, and away from roads), hauling water, and herding or riding are recommended. If the problem cannot be corrected with preventative measures, then early exits from the pastures, adjustments in the AMP, stocking levels, or other management or administrative actions may be necessary.

The purpose of utilization monitoring is to ensure that herbaceous vegetation is managed to provide for suitable habitat and forage for various wildlife species, to meet physiological requirements for forage and browse plants, and promote or maintain proper range/watershed conditions.

**Maintenance of range improvements:** Permittees will maintain assigned range improvements within their Allotment. This is in accordance with Part 3, clause 2 of the term grazing permit. If your neighbor is turning out before you on an adjacent pasture and the boundary fence is your responsibility, this fence must be repaired before your neighbor turns out.

**Livestock Distribution:** Salting and maintaining improvements are good ways to achieve proper livestock distribution. Frequent riding may be necessary to break up concentrations of livestock. A full-time rider may be needed to herd livestock onto lightly used areas, reducing grazing pressure on riparian areas and meadows.

**Fire Prevention:** All vehicles should be equipped with a properly functioning exhaust system. A shovel and axe for use in extinguishing camp and forest fires should be carried. All open camp and branding fires, when allowed, must have a fire ring down to the mineral soil, and be handled in a safe manner. All State and local fire regulations and restrictions will be observed. Report any fires to the fire dispatcher at **928-333-6360**.
