(b)(6)

Dear (b)(6)

The following are your 2023 annual operating instructions (AOI) for the Boneyback grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

Authorized Use

The following table describes authorized livestock numbers per grazing unit, anticipated use dates, and proposed monitoring dates. Please request a change in this schedule well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Grazing Unit	Dates of Use	Tentative Monitoring Date	Authorized Livestock	Rationale/Comments
Unit 3	December 1 st 2022 January 15 th 2023	January 23 rd	39 Cows 5 Bulls 3 Yearlings	
Units 4+5+6+7	January 16 th April 15 th	April 24 th	39 Cows 5 Bulls 3 Yearlings	
Units 8+9	April 16 th July 31 st	August 7 th	39 Cows 5 Bulls 3 Yearlings	Yearlings will be removed before May 31 st
Units 1+2	August 1 st October 31 st	November 7 th	39 Cows 5 Bulls	
Unit 3	November 1 st January 15 th	Next AOI	39 Cows 5 Bulls	

Monitoring:

Upland utilization is measured at the end of the growing season in key areas for key forage species. This information, along with vegetation condition, forage plant production and vigor, soil and watershed condition, will be used to make informed management recommendations concerning pasture moves and stocking rates.

Riparian utilization in key reaches is measured during growing season to verify residual vegetation is present for stream bank protection during flow events.

Grazing intensity will be evaluated during the growing season to make necessary changes needed for plant development and recovery.

Vegetative Use Guidelines:

Grazing will be managed so conservative use levels are achieved over the long-term in pasture key areas. It is your responsibility as permittee to take action so that livestock grazing does not exceed vegetative use thresholds. Please arrange for an allotment inspection if seasonal vegetative use of available forage approaches these thresholds.

Vegetation	Use Threshold
Upland herbaceous species	30-40% of current year's growth
Upland browse species	50% of current year's growth
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall
Stream banks (if applicable)	Limited to less than 20% alteration of alterable stream banks
Mexican Spotted Owl PAC's (where applicable)	20% optimum-40% maximum
Annual Grasses	50% of current year's growth

Range Improvement Maintenance:

All range improvements must be maintained to Forest Service standards before cattle will be allowed to enter the units. You must receive verbal concurrence for each project before work can begin except routine maintenance (e.g. cleaning dirt tanks, maintaining fence, restoring pipe). It is your responsibility to be aware of and comply with fire restriction.

The following table describes 2023 proposed range improvement projects.

Pasture	Location	Description of Work	Clearances Needed
Unit 6 and Unit 9	Oak Spring/Horse Range	Install new pipeline and storage tanks	Already existing infrastructure.

Units 8 and 9	Boneyback Mountain	Add additional troughs and storage to the existing Water System	Review complete. Ranger Decision needed
Units 5 and 6	Finley Tank Horse Mesa Tank	Clean tanks	None, existing improvement to be maintained

Salting:

In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

Supplements and Attractants

Protein blocks, nutritional supplement, and other attractant may be authorized.

Supplemental Feeding:

No supplemental feeding is authorized.

Weeds

Invasive plants threaten ecosystem health and grazing resources. Please assist us in preventing the introduction and spread of invasive plants.

If you have any questions, please contact Eric Hoskins, Rangeland Management Specialist, at (480) 435-5563.

Sincerely,

(b)(6)
