

**2024-2025
Annual Operating Instructions
Brushy Allotment**

This document serves as your 2024-2025 Grazing Year, Annual Operating Instructions (AOI) for the Brushy Allotment. This AOI is part of your Term Grazing Permit as provided for in Part 2, section 8(a).

GRAZING SCHEDULE

The Annual stocking level (annual authorized livestock numbers and dates) are considered approximate. The actual dates and numbers may change due to many variables. Annual stocking level is based on current and expected forage production. The planned use period in a pasture and livestock numbers can/should be adjusted if conditions change, either (shortened or lengthened, depending on forage availability but not in excess of the permitted numbers and utilization in key areas).

*Any changes from these Annual Operating Instructions are to be coordinated and confirmed in advance and will be made only with prior written Forest Service Officer Approval. (An Amendment)

*If emergency conditions require making an immediate change, notify the Forest Service Officer promptly.

Authorization

Upon payment of fees, the following is the planned grazing sequence for the 2024-2025 grazing season:

Number of Livestock	Pasture	Grazing Period
125	4 Sections	12/01/2024 - 01/31/2025
125	Basin	2/1/2025 – 4/30/2025

Rested (Ungrazed) Pastures for the Grazing Season

None

RESOURCE MONITORING

Allowable Use

Key species and proper utilization for uplands include:

- Sideoats Grama 35%
- Blue Grama 30%
- Three Awn 40%
- Squirrel Tail 30%
- Western Wheat Grass 40%

Key Species and proper utilization for riparian areas include:

- Blue Grass 3" stubble height
- Sedges 4" stubble height
- Wire Grass 4" stubble height

Cattle will be moved to the next scheduled pasture or off the allotment when allowable use standards are met, no matter what the dates on paper are. Failure to remove your cattle to avoid use above the allowable levels is a violation of these instructions and the terms of your grazing permit.

The permittee is encouraged to participate in the allotment Monitoring process.

Actual Use

The permittee will document the following items on the enclosed Actual Use Form during the grazing year: 1) Pasture; 2) Actual Grazing Period; 3) Actual Livestock Numbers.

***It is very important that this Actual Use form be completed and submitted to your Rangeland Management Specialist at the end of the grazing year.**

RESOURCE OBJECTIVES for THIS GRAZING SEASON

Proper livestock management practices, e.g. distribution, timing of grazing, and intensity of grazing, must be managed closely to provide for plant maintenance, improved vigor, and maintenance/improvement of vegetative ground cover. When cattle are not in a pasture, ensure water is available for wildlife and escape ramps are in place on troughs.

SALTING AND PROTEIN BLOCK PRACTICES

Proper salt and protein block location can be a good tool to aid in livestock distribution and they will be used in a manner to spread livestock utilization throughout the pasture. A detailed description of the Salting and Supplemental Feeding policy can be found in Part 3 of your term grazing permit; (See AMP and Term Grazing Permit for the complete list of the guidelines.)

Place supplements to draw livestock to areas that normally receive only light use, salt minimum of ¼ mile away from water.
