Date: January 24, 2022

Fenn Land & Cattle Co., LLC

(b)(6)

2222 W. Pinnacle Peak Rd, #220
Phoenix, AZ 85027

Dear (b)(6)

This Annual Operating Instruction is a guide for management of the **Buzzard Roost Allotment** for the **2022 grazing year**. This plan is made part of your Term Grazing Permit as specified in Part 2, Number 8(a) of the permit and supersedes your 2021 AOI.

I. PERMITTED USE

The following table illustrates the number of livestock and period of use permitted on the **Buzzard Roost Allotment** as per Term Grazing Permit #12237 issued to Fenn Land & Cattle Co., LLC

KIND	CLASS	NUMBER	SEASON OF USE
CATTLE	CATTLE	416	1/1 - 12/31

II. AUTHORIZED USE

The following numbers and classes of livestock are authorized to graze on the **Buzzard Roost Allotment** this year.

KIND	CLASS	NUMBER	SEASON OF USE
CATTLE	COW	170	3/1 - 2/28
	BULL	30	
	YEARLING	40	
HORSES	HORSE	10	

III. PROPOSED ROTATION SCHEDULE

Actual dates may vary depending upon climatic conditions, drought, wildfire, noxious weeds, soil, and range conditions, conflicts with or for protection of wildlife, water availability, utilization levels and time required to move livestock. Any deviation from this schedule should be discussed with Pleasant Valley range staff prior to moving your cattle outside of the dates listed. Estimates of forage utilization will be performed and documented on pastures about the time the pasture is vacated.

AUTHORIZED PASTURE	CLASS OF LIVESTOCK	PROPOSED NUMBER	PROPOSED SEASON OF USE †
JERKY BUTTE	COW	170	3/1-3/30
	BULL	30	
	YEARLING	40	
SHIPPING	COW	170	4/1-4/15
	BULL	30	
	YEARLING	40	
DINNER CREEK	COW	170	4/15-5/15
	BULL	30	
	YEARLING	40	
BUZZARD ROOST	COW	170	5/15-7/1
	BULL	30	
	YEARLING	40	
PINE	COW	170	7/1-8/30
	BULL	30	
	YEARLING	40	
REDMAN	COW	170	9/1-10/31
	BULL	30	
	YEARLING	40	
REDMAN MIDDLE PASTURE	COW	170	11/1 - 2/28
	BULL	30	
	YEARLING	40	
HORSE	HORSE	10	3/1 - 2/28

† These represent **average move dates** where it is expected that 50% of the cattle will be on or off the pasture by these dates.

IV. ALLOWABLE USE STANDARDS

The use on key species in key areas will ultimately determine the length of the grazing period in each pasture. The establishment of the utilization standards is consistent with 36 CFR 222 regulations, FSM 2210 and 2230, and FSH 2209.21.

Grazing will be managed so that conservative use levels are achieved over the long-term. Considerable research has been done showing that conservative use levels will allow for sustaining and improving watershed conditions. Conservative utilization levels are as follows:

Upland	Herbaceous:	30-40% of current year's growth
	Woody:	50% of current year's growth
Riparian	Herbaceous:	40% of plant species biomass (any species) and maintain 6-8 inches of stubble height on Deergass
	Woody:	50% of leaders browsed on upper 1/3 plants up to 6 feet tall

Mexican Spotted Owl PAC's (Where Applicable)	20% optimum to 40% maximum Management Mexican Spotted Owl and Northern Goshawk habitats within the allotment are according to standards and guidelines in the Tonto NF Plan (pages 40-1 through 40-13).
---	--

Utilization is measured at the end of the growing season, in key areas* for key forage species**. However, grazing intensity will be evaluated during the growing season in order to practice proactive management and make necessary management changes needed for plant development and recovery. Utilization measurements serve as only one piece of information that is considered when evaluating the effectiveness of allotment management. Utilization data will be coupled with other information such as vegetation condition, forage plant production and vigor, soil and watershed condition, and long-term trends, in order to make informed management recommendations concerning pasture moves and stocking rates.

* Key areas are defined in the Tonto NF Plan (pg. 42-1) as being ¼ to 1 mile from water, located on productive soils on level to intermediate slopes, and be readily accessible for grazing.

**Key forage species are defined in the Tonto NF Plan (pg. 42-1) as plants chosen to be appropriate to monitor average allowable use.

V. MONITORING

Monitoring dates are tentative, and some may not be required. Range personnel from the Payson District will be contacting you prior to monitoring visits. We encourage your participation in these inspections, as it provides an opportune time to discuss resource conditions and management items. VGS Monitoring may be conducted in the fall. A priority for monitoring may be based upon those allotments with forthcoming NEPA.

VI. ADMINISTRATION

The table below indicates the records submitted by the permittee to satisfy the Ownership Requirement portion of the permit. The permittee must hold ownership of the corporation (if applicable), deed for the base property, and brand associated with that permit for the entire term of the permit. Any undocumented changes in ownership are a violation of the terms and conditions of your term grazing permit under Part 2, Sec. 7.

Entity/Person(s) Designated as Permittee	(b)(6)
Base Property	(b)(4)
Brand	(b)(6)

We request that you maintain records that reveal the number of livestock, date of entry, and the date of livestock leaving each pasture and submit them to us at the end of the grazing season.

VII. SALT AND MINERAL BLOCK

Salting may be used to aid in livestock distribution and management. Salting must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

VIII. RANGE IMPROVEMENT CONSTRUCTION / MAINTENANCE

The permittee shall maintain all range improvements that are assigned for maintenance in the Term Grazing Permit. All work involving the use of heavy equipment will be accomplished only after prior approval of the Forest Officer in charge of the allotment. Contact Payson Ranger District for status of current fire restrictions before beginning any work.

BUZZARD ROOST ALLOTMENT IMPROVEMENT WORK SCHEDULED			2022
PERMIT MODIFICATION NUMBER	DESCRIPTION	WORK PERIOD	COMMENTS
TBD	New corrals at Malicious Gap		Pending NEPA
N/A	Juniper Push	2022	Pending Arch

IX. PROTECTION

The permittee, his agents and employees, when acting within the scope of their employment, and his contractors and subcontractors will protect the land and property of the United States, waived private land and other land under jurisdiction of the Forest Service covered by and used in conjunction with this permit.

X. ALLOTMENT INSPECTIONS

Forest personnel may conduct periodic brief inspections of pastures within the allotment at any time to verify actual use, improvement conditions, or other non-range related activity.

XI. PERMIT CONDITIONS

Failure to comply with any of the terms and conditions specified in Parts 1, 2, and 3 of your Term Grazing Permit may result in suspension or cancellation, in whole or in part, after written notice. This is found in Part 1, Section 3, of your permit.

Sincerely,

**MATTHEW
PACIOREK**
