b)(6)		

Dear	(b)(6)	

The following are your 2023 annual operating instructions (AOI) for the Dagger grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

#### **Authorized Use**

The following table describes authorized livestock numbers per grazing unit, anticipated use dates, and proposed monitoring dates. Please request a change in this schedule well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Grazing Unit	Dates of Use	Tentative Monitoring Date	Authorized Livestock	Rationale/Comments
Upper Coon (Banning)	Current- March 31, 2023	April 7 <sup>th</sup>	185 Cows 12 Bulls 27 Yearlings	
North Sheep	April 1 <sup>st</sup> August 31 <sup>st</sup>	September 7 <sup>th</sup>	145 Cows 6 Bulls 27 Yearlings	Yearlings will be removed by May 31
Little Sheep	April 1 <sup>st</sup> August 31 <sup>st</sup>	September 7 <sup>th</sup>	40 Cows 6 Bulls	
Rock and Ellison	September 1 <sup>st</sup> January 15 <sup>th</sup>	Next AOI	185 Cows 12 Bulls	

# Monitoring:

Upland utilization is measured at the end of the growing season in key areas for key forage species. This information, along with vegetation condition, forage plant production and vigor, soil and watershed condition, will be used to make informed management recommendations concerning pasture moves and stocking rates.

Riparian utilization in key reaches is measured during growing season to verify residual vegetation is present for streambank protection during flow events.

Grazing intensity will be evaluated during the growing season to make necessary changes needed for plant development and recovery.

## Vegetative Use Guidelines:

Grazing will be managed so conservative use levels are achieved over the long-term in pasture key areas. It is your responsibility as permittee to take action so that livestock grazing does not exceed vegetative use thresholds. Please arrange for an allotment inspection if seasonal vegetative use of available forage approaches these thresholds.

Vegetation	Use Threshold	
Upland herbaceous species	30-40% of current year's growth	
Upland browse species	50% of current year's growth	
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass	
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall	
Streambanks (if applicable)	Limited to less than 20% alteration of alterable streambanks	
Mexican Spotted Owl PAC's (where applicable)	s 20% optimum-40% maximum	
Annual Grasses	50% of current year's growth	

#### Range Improvement Maintenance:

All range improvements must be maintained to Forest Service standards before cattle will be allowed to enter the units. You must receive verbal concurrence for each project before work can begin except routine maintenance (e.g. cleaning dirt tanks, maintaining fence, restoring pipe). It is your responsibility to be aware of and comply with fire restriction.

The following table describes 2023 range improvement projects.

Pasture	Location	Description of Work	Clearances Needed
Upper Coon Creek (Banning)	Banning	Reactivate Cherry Creek Well and existing improvement.	None, Existing infrastructure. Stay within existing footprint.

Cherry Creek	Cherry Creek	Reconstruct fence around Cherry Creek riparian to keep cattle within pastures.	None, Existing improvement.
--------------	--------------	---	-----------------------------

#### Salting:

In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

#### Supplements and Attractants

Protein blocks, nutritional supplement, and other attractant may be authorized.

## Supplemental Feeding:

No supplemental feeding is authorized.

## Weeds

Invasive plants threaten ecosystem health and grazing resources. Please assist us in preventing the introduction and spread of invasive plants.

If you have any questions, please contact Eric Hoskins, Rangeland Management Specialist, at (480) 435-5563.
