

**GRAZING YEAR 2020/2021
ANNUAL OPERATING INSTRUCTIONS
GRANITE ALLOTMENT**

The objectives of these instructions are, prior to the grazing season, to:

- identify specific management tools/resource objectives for this grazing season
- review general permit administration and livestock management requirements, and
- document any needs or agreements beyond the standard directions.

MANAGEMENT TOOLS/RESOURCE OBJECTIVES for this GRAZING SEASON

Perennial grasses and major browse species need the opportunity to maintain or improve their vigor.

- When grazing turns to green (not necessarily growing) perennial grasses, this is the trigger to watch utilization closely and be prepared to move off to meet utilization standards.
- Tentative dates based on proper utilization levels. Proper utilization levels are set at a standard known to provide sufficient litter. Move to next pasture or off forest, regardless of date, when utilization standards on key areas are met.

AUTHORIZATION

Upon payment of fees, livestock are authorized as follows for the fall of 2020 – winter of 2021:

<u>Number of Cattle</u>	<u>Pasture</u>	<u>Grazing Period (may be modified to meet utilization)</u>
225	North	10/1/20- 01/18/20
225	South	01/19/20-03/31/20

- The Forest Officer must be given actual use, by pasture, after livestock are off the allotment.
- Any change from these Annual Operating Instructions is to be coordinated and confirmed in advance with the Forest Officer, best if a week or two in advance. If emergency conditions require making a change immediately, notify the Forest Officer promptly.
- Move your livestock regardless of the date shown above, to avoid exceeding utilization levels. If utilization levels are appropriate then livestock moves must be 90% accomplished by the dates given above.
- You are responsible for your representatives and/or employees following all Forest Officer instructions.
- If you have a question about the utilization levels you are observing please contact your Forest Officer for a visit to your allotment.

SPECIAL INSTRUCTIONS

Watch utilization closely this year, keep RMS informed.

ALLOWABLE USE

Cattle will be moved to the next scheduled pasture or off the allotment when allowable use standards are met, no matter what the agreed upon dates are.

Forage utilization on upland forage will be targeted at 35% in pastures used during the growing season and 50% in pastures used during the dormant season. Utilization on upland shrubs will be 50% of available leaders and utilization on riparian woody species will be 20% of current year's growth.

Failure to remove your cattle to avoid use above the allowable levels is a violation of these instructions and the terms of your grazing permit.

SALT AND SUPPLEMENTS

The thoughtful placement of salt, mineral, and protein is a valuable distribution aid. Salt will not be located in heavy use areas, including within 1/4 mile of water. Instead, place supplements to draw livestock to areas that normally receive only light use.

RANGE IMPROVEMENTS

Maintenance will follow the standards in your Part 3 of your grazing permit. In addition to routine maintenance, the following must be accomplished.

Pipeline to north/south fence will be completed by November 1 2020.

Schroder tank conversion to trick tank completed 3/31/20.

PERMITTEE COMMENTS and SUGGESTIONS

Permittee would like to pursue cutting woody vegetation allotment wide.

PERMIT CONDITIONS

These Annual Operating Instructions are a part of the Term Grazing Permit as provided for in Part 2, Section 8(a). They comply with the standards and guidelines found in the Forest Plan. Failure to follow any of the terms and conditions specified in Parts 1, 2, and 3 of your Term Grazing Permit may result in suspension or cancellation, in whole or in part, after written notice. (Refer to Part 1, Section 3, of your permit.)
