(b)(6)

**Greenback Allotment**

(b)(6)

Dear (b)(6)

The following are your 2023 annual operating instructions (AOI) for the Greenback grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

**Authorized Use**

The following table describes authorized livestock numbers per grazing unit, anticipated use dates, and proposed monitoring dates. Please request a change in this schedule well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Grazing Unit	Dates of Use	Tentative Monitoring Date	Authorized Livestock	Rationale/Comments
<b>Herd 1</b>				
Methodist and Panther	Current-February 28 <sup>th</sup> 2023	March 7 <sup>th</sup>	55 Cows 5 Bulls 40 Yearlings	Yearlings removed by May 31 <sup>st</sup>
1 <sup>st</sup> and 2 <sup>nd</sup> Basin	March 1 <sup>st</sup> October 31 <sup>st</sup>	November 7 <sup>th</sup>	55 Cows 5 Bulls	
Methodist and Panther	November 1 <sup>st</sup> February 28 <sup>th</sup>	Next AOI	55 Cows 5 Bulls	
<b>Herd 2</b>				
Mud Springs and Ridges	Current-May 15 <sup>th</sup>	May 22 <sup>nd</sup>	50 Cows 5 Bulls 35 Yearlings	Yearlings removed by May 31 <sup>st</sup>
Goat	May 16 <sup>th</sup> June 15 <sup>th</sup>	June 22 <sup>nd</sup>	50 Cows 5 Bulls	
Dinner Creek	June 16 <sup>th</sup>	October 9 <sup>th</sup>	50 Cows 5 Bulls	

	September 30 <sup>th</sup>			
Mud Springs and Ridges	October 1 <sup>st</sup> Next AOI	Next AOI	50 Cow 5 Bulls	

**Monitoring:**

Upland utilization is measured at the end of the growing season in key areas for key forage species. This information, along with vegetation condition, forage plant production and vigor, soil and watershed condition, will be used to make informed management recommendations concerning pasture moves and stocking rates.

Riparian utilization in key reaches is measured during growing season to verify residual vegetation is present for streambank protection during flow events.

Grazing intensity will be evaluated during the growing season to make necessary changes needed for plant development and recovery.

**Vegetative Use Guidelines:**

Grazing will be managed so conservative use levels are achieved over the long-term in pasture key areas. It is your responsibility as permittee to take action so that livestock grazing does not exceed vegetative use thresholds. Please arrange for an allotment inspection if seasonal vegetative use of available forage approaches these thresholds.

<b>Vegetation</b>	<b>Use Threshold</b>
Upland herbaceous species	30-40% of current year's growth
Upland browse species	50% of current year's growth
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall
Streambanks (if applicable)	Limited to less than 20% alteration of alterable streambanks
Mexican Spotted Owl PAC's (where applicable)	20% optimum-40% maximum
Annual Grasses	50% of current year's growth

**Range Improvement Maintenance:**

All range improvements must be maintained to Forest Service standards before cattle will be allowed to enter the units. You must receive verbal concurrence for each project before work can begin except routine maintenance (e.g. cleaning dirt tanks, maintaining fence, restoring pipe). It is your responsibility to be aware of and comply with fire restriction.

The following table describes 2023 authorized range improvement projects.

Pasture	Location	Description of Work	Clearances Needed
Methodist and Panther	Chubb Mountain Water System Pipeline Extension	Extension on the Chubb Mountain Pipeline to additional troughs in Methodist and Panther Gulch	Project was approved through a Decision Memo in 2018
1 <sup>st</sup> Basin	Little Cherry Mesa Pipeline	Extension on Chubb Mountain Pipeline to the North	Project has biological and archeological clearances. Needs final on the ground review and flagging prior to implementation.
1 <sup>st</sup> Basin	Chubb Mountain Pipeline	Extension to a single trough in Panther Gulch area.	Project has been approved.

**Salting:**

In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

**Supplements and Attractants**

Protein blocks, nutritional supplement, and other attractant may be authorized.

**Supplemental Feeding:**

No supplemental feeding is authorized.

**Weeds**

Invasive plants threaten ecosystem health and grazing resources. Please assist us in preventing the introduction and spread of invasive plants.

If you have any questions, please contact Eric Hoskins, Rangeland Management Specialist, at (602) 225-5332.

Sincerely,

(b)(6)

(b)(6)
