ARIZONA GAME AND FISH DEPARTMENT HABITAT PARTNERSHIP PROGRAM

HABITAT ENHANCEMENT AND WILDLIFE MANAGEMENT PROPOSAL

PROJECT INFORMATION					
Project Title: Sunnyside Canyon Water Storage	e/Drinker				
Development		Project No. 09-503			
Region/GMU: Region 5/ GMU 35A	HPC: Douglas/Sierr	a Vista			
Project Type: Yearlong Water Development					
Project Description: Construct a 2,500 gallon polyethylene water storage tank, and replace drinker at end of existing waterline, located on USFS lands. This waterline currently does not support yearlong water due to insufficient flow from a well located in Scotia Canyon, and due to vandalism on the waterline and trough float by illegal border crossers.					
Wildlife Species to Benefit: Gould's Turkey (80%),					
Possible Funding Partners: NWTF State Chapter, ADA, SCI Implementation Schedule: Beginning: September 1, 2009 Completed: March 31, 2010 Completed: Yes No Projected Completion Date:					
PROJECT FUNDING					
SBG Funds Requested: \$1,485.40					
Cost Share Funds: \$1,973.60					
Total Project Costs: \$3,459.00					
PARTICIPANT INFORMATION					

Applicant: John Millican, President Address: 9035 E. Chandler Lane **Huachuca Gould's Chapter of NWTF** Hereford, AZ 85615 (please print) **Telephone: 520-508-4272** AGFD Contact and Phone No. **Brad Fulk, Sector 8 Field Supervisor** Region 5, Tucson 520-400-4575 (If applicant is not AGFD personnel) Coordinated with: Lone Mountain Ranch Date: January 2009 James Heitholt, USFS, Sierra Vista July, 2009 July, 2009 Glenn Frederick, USFS, Sierra Vista August, 2009 Douglas, Sierra Vista HPC **Applicant's signature: Date: August 10, 2009**

SEND COMPLETED APPLICATIONS TO:

AZ Game and Fish Department Attn: Game Branch 5000 W. Carefree Highway Phoenix, AZ 85086 rgregory@azgfd.gov

WAS PROJECT PRESENTED TO THE LOCAL HPC?	YES X
NO	

HAS PROJECT BEEN SUBMITTED IN PREVIOUS YEARS? NO IF SO WAS IT FUNDED?

NEED STATEMENT/PROBLEM ANALYSIS: The development of a water storage tank and wildlife accessible trough will provide yearlong water to an area that contains critical habitat for the Gould's turkey. The Sunnyside Canyon drainage supports one of the largest concentrations of Gould's turkey throughout the Huachuca Mountains. The project area is located to the east of Sunnyside Canyon and does not support a perennial water source, particularly, during the driest months of April –July. Coincidentally, these months are critical to Gould's turkey due to breeding, nesting, and poult rearing. Therefore, turkeys utilize the area infrequently even though the habitat is sufficient to support a robust population.

The project area is made up of diverse habitat types necessary for Gould's turkey to exist on a yearlong basis. Roost trees, the limiting habitat component of turkey's, are prevalent throughout the area, but are utilized on a seasonal basis when water is available due to seasonal rainfall patterns.

Water is currently supplied to the project site by a waterline that extends from a solar operated well located in Scotia Canyon. Livestock are grazed by the Lone Mountain Ranch throughout the winter months (November-March). Due to insufficient water output by the well, and vandalism to the waterline and float valve on existing trough, water availability is not predictable on a yearly basis, particularly, during the driest months of April-July when livestock are not in the area.

Through the development of a 2,500 gallon polyethylene storage tank and a wildlife drinker installed with a float cover, yearlong water availability and a reduction in vandalism will result in the increase of approximately 4 square miles of critical turkey habitat.

The USFS and Lone Mountain Ranch have agreed that a condition of the lease agreement will be to provide yearlong water to the storage tank and trough, and to fill both prior to removing livestock from the pasture. The Lone Mountain Ranch and the Huachuca Gould's Chapter will work as a partnership to maintain the storage and trough. The Lone Mountain Ranch will provide maintenance to the existing solar well and pipeline feeding the project.

PROJECT OBJECTIVES:

Purchase, install and plumb a 2,500 gallon polyethylene storage tank at end of existing water line pumped from a solar well in Scotia Canyon. Shut off valves will be installed at the inlet and outlet of the storage tank, to assist with maintenance. Additionally, the existing trough will be replaced with a fiberglass trough that is wildlife friendly and provides a float cover. Escape ramps will be installed in the trough.

Upon completion, the project area which currently is void of perennial water will provide Gould's turkey and other wildlife with the only yearlong water within 4 square miles.

PROJECT STRATEGIES:

Utilize SBG funds to purchase a 2,500 gallon polyethylene water storage tank, and plumb into existing water line east of Sunnyside Canyon to provide yearlong wildlife water. The project area is important roost, loafing, nesting and poult rearing for Gould's turkey, and has diverse vegetative types ideal for whitetail deer.

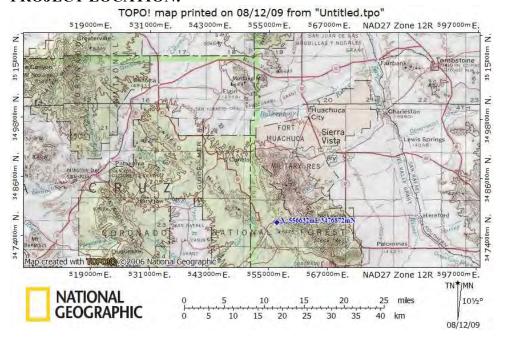

Along with the addition of a storage tank, the existing trough will be replaced with a fiberglass trough, accessible to wildlife, and fabricated with a float cover. Wildlife ramps will be installed to facilitate access to and from the drinker by wildlife. This trough and associated pipe and fittings associated with plumbing into the existing line will be provided by the Huachuca Gould's Chapter of the NWTF.

Since the water will be available to livestock during the winter months, no fence will need to be constructed around the project. Under the forest grazing plan, the leasee, Lone Mountain Ranch, will be required to maintain the well and water line, and assure that the storage tank and trough are full on a yearlong basis. All general maintenance and yearly checks to the system will be accomplished by the Lone Mountain Ranch and the Huachuca Gould's Chapter.

PROJECT MAP: GMU 35A, T 23S, R 19E,SW 1/4 of Sec. 15

PROJECT LOCATION:

LAND OWNERSHIP AT PROJECT SITE (Please state specifically if PRIVATE PROPERTY and provide landowner's name):
United States Forest Service

IF PRIVATE PROPERTY, IS THERE A STEWARDSHIP AGREEMENT BETWEEN THE LANDOWNER AND THE DEPARTMENT? NOT APPLICABLE

HABITAT DESCRIPTION:

The habitat type is typically referreed to as Madrean Oak Woodlands, comprised primarily of various oak species (Quercus sp.), Juniper (Juniperus sp.), pinion (Pinus sp.), manzanita (Arctostaphylos sp.), cliffrose (Cowania mexicana) various native grasses and forbs. The area also hosts distinct galleries of Chihuahua Pine (Pinus lelophylla var. chihuahuana) and Apache Pine (Pinus engelmannii). The area lies at a range of approximately 5800-6300 foot elevation with a number of drainages and riparian areas cutting through the hills. These drainages consist of a variety of riparian species, including cottonwood (Populus sp.), sycamore (Platanus wrightii), Arizona walnut (Juglans major), and willow (Salix sp.)

Requested		\$1,485.40
Cost Share		\$1,973.60
	TOTAL	\$3,459.00

LIST COOPERATORS AND DESCRIBE POTENTIAL PARTICIPATION:

<u>Douglas/Sierra Vista HPC</u> – Review and approve project proposal

<u>Lone Mountain Ranch</u> – Maintain Scotia Canyon well, water line and yearlong water level in storage tank and trough.

<u>USFS</u> – Develop lease agreement with Lone Mountain Ranch Haul 2,500 gallon storage tank and trough to project site

<u>Huachuca Gould's Chapter</u> – Provide fiberglass trough, plumbing materials, installation of storage tank and trough, and perform yearly field checks and maintenance as required to storage tank and trough.

Assist AZGFD with conducting yearly spring turkey surveys in project area.

PROJECT MONITORING PLAN:

The Lone Mountain Ranch will monitor and maintain the solar well and water line feeding the project, along with maintaining full water levels to the storage tank and trough on a yearlong basis.

The Huachuca Gould's Chapter will perform yearly field checks and maintenance as required to the storage tank and trough.

The Huachuca Gould's Chapter under the direction of the Arizona Game and Fish Department will provide support in conducting annual spring turkey surveys and field checks.

PROJECT MAINTENANCE:

The Lone Mountain Ranch and USFS will maintain the solar well in Scotia Canyon, along with the waterline feeding the storage tank and trough. They will also maintain the storage tank and trough as needed to assist with their livestock management.

The Huachuca Gould's Chapter will assist by providing yearly field checks and routine maintenance as required to the storage tank and trough.

It is anticipated that minimal maintenance to the tank and trough will be required.

PROJECT COMPLETION REPORT TO BE FILED BY: John Millican, President Huachuca Gould's Chapter
