Woody Cline (permittee) and Tonto National Forest

**NEED STATEMENT – PROBLEM ANALYSIS:**

The Scarlet Spring is one of the few springs near Young/Pleasant Valley that is utilized heavily by wildlife and cattle. This spring is currently in need of repair to increase it's pumping efficiency from the spring to a drinker. The system has since exceeded its capacity and is in need of an upgrade. The holding tanks are also in need of an upgrade due to it's limited holding capabilities. In addition, perennial water is limited to Cherry creek to the west and a few dirt tanks to the north and south.

**PROJECT OBJECTIVES:**

Provide wildlife water for both game and non-game species in the southern portion of Hog Canyon.  
Provide additional perennial water for wildlife.

**PROJECT DESCRIPTION AND STRATEGIES:**

(How will you implement project)

This strategy for this proposal is to provide funding to the permittee to purchase materials needed to redevelop this spring to increase its efficiency and to increase the water holding tanks capabilities. The proposed strategy is to utilize solar panels, a solar pump, a control box, and 2 -3,000 gallon holding tanks.

The permittee obtained an upgraded trough and poly pipe from Tonto National Forest Pleasant Valley Ranger District. The permittee will cost share the labor for this project.

The poly pipe used will stretch about 1/8 a mile north to the drinker.

This project is undergoing the NEPA process and will not be completed before the September 1 deadline, but will be completed before the implementation of these tanks.

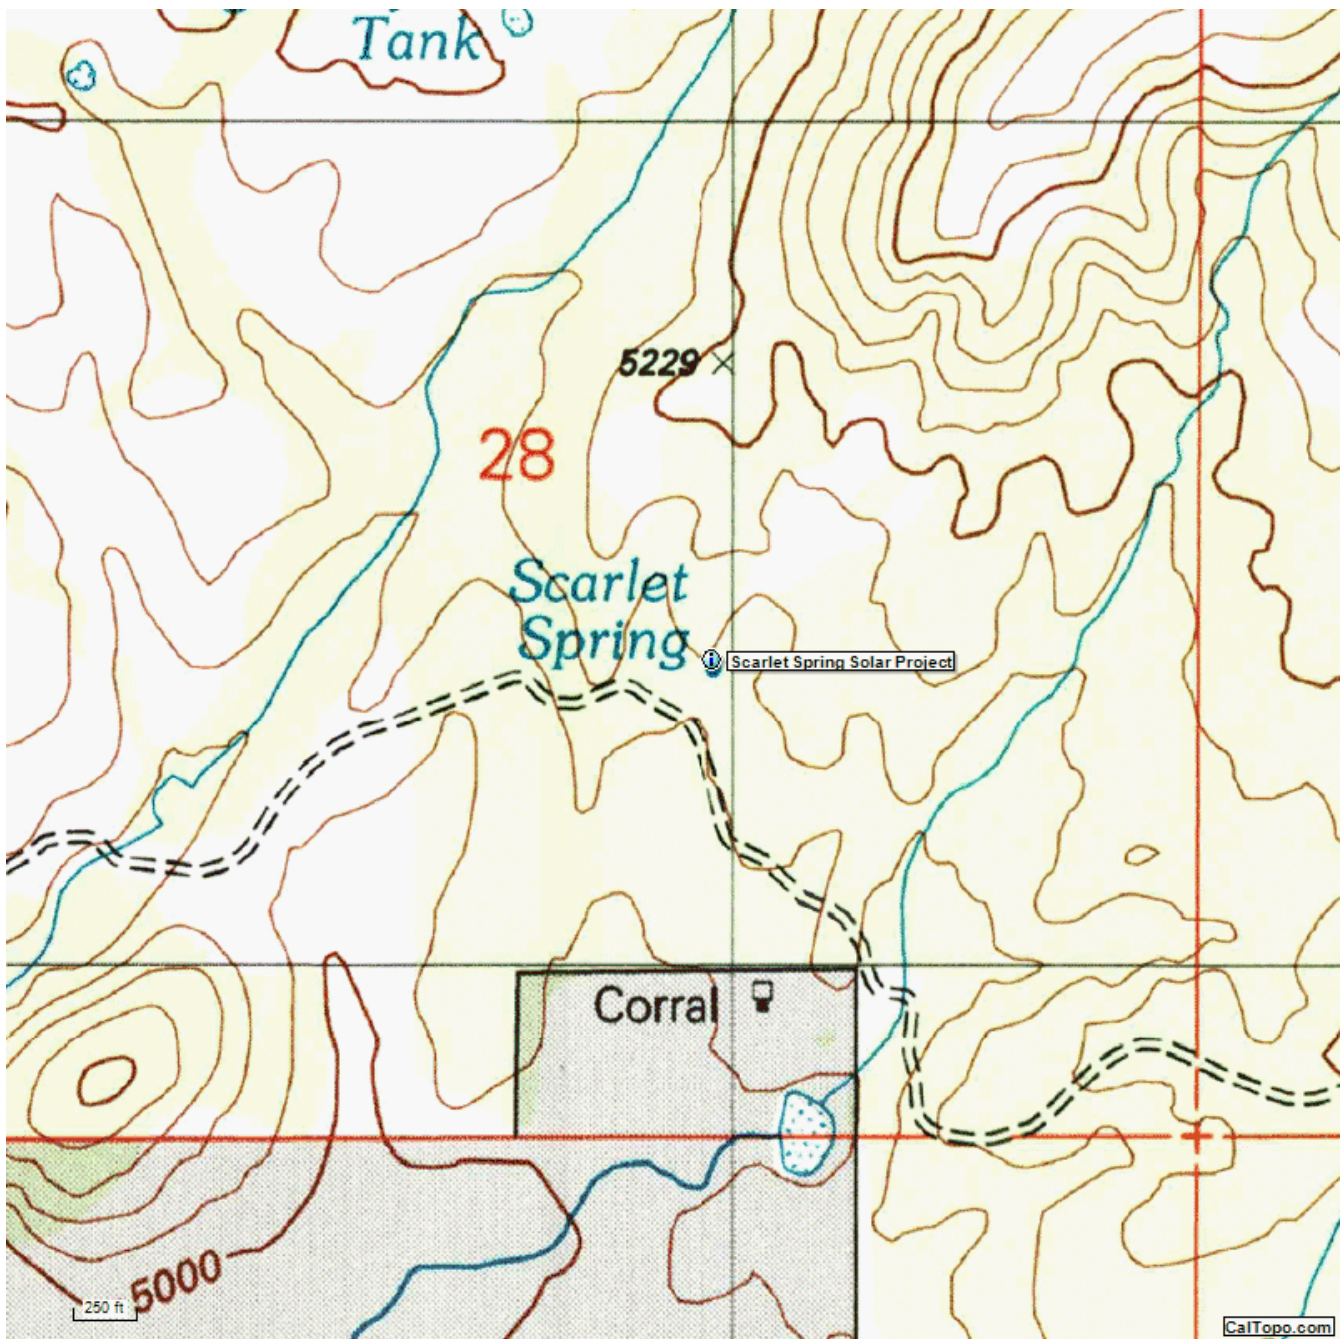

**PROJECT LOCATION**

(Please provide lat/long of project area and datum. If project is larger than one point, please add multiple lat/long points or an existing shape file of the project area)

This project is located in the Pleasant Valley Ranger District near Hog Canyon, just East of Forest Road 54.
