Range Improvement Maintenance: All range improvements must be maintained to Forest Service standards (available at District Office) before cattle will be allowed to enter pastures. It is your responsibility to be aware of and comply with fire restriction.

Monitoring: Last year the drought affected everyone. Although rain has come more regularly in the last 6 months, be aware that forage production this year may be stunted due to our most recent drought.

Allowable Use Standards:

Vegetation	Use Threshold
Upland herbaceous species	30-40% of current year's growth
Upland browse species	50% of current year's growth
Riparian herbaceous species	Limited to 40% of plant species biomass and maintain 6-8 inches of stubble height on deergrass
Riparian woody species	Limited to 50% of leaders browsed on upper 1/3 of plants up to 6 feet tall

Salting, Supplements, and Attractants: In most cases, salt must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites. Protein blocks, nutritional supplement, and other attractant may be authorized prior to use. No supplemental feeding is authorized, such as hay.

If you have any questions, please contact A. Jamie Wages, Range Staff, at (928) 402-6222 or (480) 291-4500.

Sincerely,

MARK SANDO
District Ranger
