File Code: 2210

Date: January 24, 2022

This Annual Operating Instruction is a guide for management of the **Potato Butte Allotment** for the **2022 grazing year**. This plan is made part of your Term Grazing Permit as specified in Part 2, Number 8(a) of the permit and supersedes your 2021 AOI.

## I. PERMITTED USE

The following table illustrates the number of livestock and period of use permitted on the **Potato Butte Allotment** as per Term Grazing Permit #12224 issued to Potato Butte Ranch, LLC.

KIND	CLASS	NUMBER	AUM	SEASON OF USE
CATTLE	ADULT CATTLE	69	828	1/1 - 12/31
	,	TOTAL	828	

### II. AUTHORIZED USE

The following numbers and classes of livestock are authorized to graze on the **Potato Butte Allotments** this year.

KIND	CLASS	NUMBER	SEASON OF USE
CATTLE	MATURE COW	32	3/1 - 2/28
CATTLE	BULLS	4	3/1 - 2/28

#### III. PROPOSED ROTATION SCHEDULE

Actual dates may vary depending upon climatic conditions, drought, wildfire, noxious weeds, soil, and range conditions, conflicts with or for protection of wildlife, water availability, utilization levels and time required to move livestock. Any deviation from this schedule needs to be discussed with Pleasant Valley range staff prior to moving your cattle outside of the dates listed. Estimates of forage utilization will be performed and documented on pastures about the time the pasture is vacated.

AUTHORIZED PASTURE	CLASS OF LIVESTOCK	AUTHORIZED NUMBER	AUTHORIZED SEASON OF USE	
North & South	MATURE COW	32	3/1-2/28	
NORTH & 300TH	BULLS	4	3/1-2/20	

### IV. ALLOWABLE USE STANDARDS

The use on key species in key areas will ultimately determine the length of the grazing period in each pasture. The establishment of the utilization standards is consistent with 36 CFR 222 regulations, FSM 2210 and 2230, and FSH 2209.21. Grazing will be managed so that conservative use levels are achieved over the long-term. Considerable research has been done showing that conservative use levels will allow for sustaining and improving watershed conditions. Conservative utilization levels are as follows:

	Herbaceous:	30-40% of current year's growth	
Upland	Woody:	50% of current year's growth	
	Herbaceous:	40% of plant species biomass (any species) and maintain 6-8 inches stubble height on Deergrass	
Riparian	Woody:	50% of leaders browsed on upper 1/3 plants up to 6 feet tall	
Mexican	20% optimum to 40% maximum  Management Movigan Spotted Outland Northern Cochault habitate within the alletm		
Spotted Owl PAC's (Where Applicable)	Management Mexican Spotted Owl and Northern Goshawk habitats within the allotmen are according to standards and guidelines in the Tonto NF Plan (pages 40-1 through 40-13).		

Utilization is measured at the end of the growing season, in key areas <sup>1</sup> for key forage species<sup>2</sup>. However, grazing intensity will be evaluated during the growing season in order to practice proactive management and make necessary management changes needed for plant development and recovery. Utilization measurements serve as only one piece of information that is considered when evaluating the effectiveness of allotment management. Utilization data will be coupled with other information such as vegetation condition, forage plant production and vigor, soil and watershed condition, and long term trends, in order to make informed management recommendations concerning pasture moves and stocking rates.

### V. MONITORING

<sup>1</sup> Key areas are defined in the Tonto NF Plan (pg. 42-1) as being ¼ to 1 mile from water, located on productive soils on level to intermediate slopes, and be readily accessible for grazing.

<sup>&</sup>lt;sup>2</sup> Key forage species are defined in the Tonto NF Plan (pg. 42-1) as plants chosen to be appropriate to monitor average allowable use.

Monitoring dates are tentative and some may not be required. Range personnel from the Payson District will be contacting you prior to monitoring visits. We encourage your participation in these inspections, as it provides an opportune time to discuss resource conditions and management items. VGS Monitoring may be conducted in the fall. A priority for monitoring may be based upon those allotments with forthcoming NEPA.

### VI. ADMINISTRATION

The table below indicates the records submitted by the permittee to satisfy the Ownership Requirement portion of the permit. The permittee must hold ownership of the corporation (if applicable), deed for the base property, and brand associated with that permit for the entire term of the permit. Any undocumented changes in ownership are a violation of the terms and conditions of your term grazing permit under Part 2, Sec. 7.

Entity/Person(s) Designated as Permittee	(b)(6) (b)(4)	
Base Property		
Brand	(b)(6)	Jœ

We request that you maintain records that reveal the number of livestock, date of entry, and the date of livestock leaving each pasture and submit them to us at the end of the grazing season.

# VII. SALT AND MINERAL BLOCK

Salting may be used to aid in livestock distribution and management. Salting must be located no closer than ¼ mile from streams, rivers, riparian areas, trails, and known archaeological sites.

## VIII. RANGE IMPROVEMENT CONSTRUCTION / MAINTENANCE

The permittee shall maintain all range improvements that are assigned for maintenance in the Term Grazing Permit. All work involving the use of heavy equipment will be accomplished only after prior approval of the Forest Officer in charge of the allotment.

POTATO BUTTE ALLOTMENT IMPROVEMENT WORK SCHEDULED		
PERMIT MODIFICATION NUMBER	IMPROVEMENT NAME AND NUMBER	COMMENTS
TBD	Pipeline from Little Walnut Windmill to storage	Clearance pending

TBD	Relocation of dutchman corral	Clearance
	Relocation of dutennian corrai	pending

### IX. PROTECTION

The permittee, his agents and employees, when acting within the scope of their employment, and his contractors and subcontractors will protect the land and property of the United States, waived private land and other land under jurisdiction of the Forest Service covered by and used in conjunction with this permit.

## X. ALLOTMENT INSPECTIONS

Forest personnel may conduct periodic brief inspections of pastures within the allotment at any time to verify actual use, improvement conditions, or other non-range related activity.

### XI. PERMIT CONDITIONS

Failure to comply with any of the terms and conditions specified in Parts 1, 2, and 3 of your Term Grazing Permit may result in suspension or cancellation, in whole or in part, after written notice. This is found in Part 1, Section 3, of your permit.

Sincerely,

MATTHEW PACIOREK
