Sleeping Beauty Complex
Date: 01/19/2023

Freeport-McMoRan Miami, INC.

(b)(6)

Dear (b)(6)

The following are your 2023 Annual Operating Instructions (AOI) for the Sleeping Beauty Complex grazing allotment. These instructions have been developed from collaboration with you and in consideration of Forest Service Handbook 2209.13, Tonto National Forest Plan, associated National Environmental Policy Act analysis, Allotment Management Plan, and available information describing range conditions.

Authorized Use

I have approved your application to graze up to 110 head of cattle, 10 bulls, and 10 yearlings (1/1-5/31) on the Sleeping Beauty Complex allotment. The following table outlines the grazing rotation:

Pasture	On	Off	Rationale/Comments
Bellevue	1/9/23	5/15/23	110 cows, 10 bulls, 10 yearlings to 5/31
Bohme	5/16/23	2/28/24	110 cows, 10 bulls, 10 yearlings to 5/31
Sleeping Beauty 1	REST	REST	REST
Sleeping Beauty 2	REST	REST	REST
Sleeping Beauty 3	REST	REST	REST

The schedule & level of authorized use above is an estimate and may be modified at any time prior to or during the grazing season if utilization levels are met, if water availability is inadequate, or for other resource management reasons. Please fill out a *Modification of AOI* request well in advance of the proposed dates. Please, maintain and submit records that indicate your compliance to permitted use.

Utilization Standards

Forage utilization will be managed at a level providing for grazed plant recovery, increase in herbage production and retention of herbaceous litter to protect soils. The following utilization standards are found in the Allotment AMP.

Range Improvement Maintenance:

All range improvements must be maintained to Forest Service standards as stated in your Term Grazing Permit. Routine maintenance of existing improvements does not require written clearance; however, construction or reconstruction of improvements must be authorized in writing from this office. Stock Tank cleaning is authorized provided there is a forest service road or motorized vehicle trail to said stock tank, and only until fire restrictions begin. You must contact District Range personnel prior to cleaning each tank to receive final clearance.

We appreciate your cooperation in the management of the Sleeping Beauty Complex Allotment. If you have any questions regarding these instructions, please contact Tyler D. McCafferty, Range Staff, at tyler.mccafferty@usda.gov.

Sincerely,

ADAM
