

2025 - 2026
Annual Operating Instructions
Toohey Allotment

This document serves as your winter season Annual Operating Instructions (AOI) for the Toohey Allotment. This AOI is part of your Term Grazing Permit as provided for in Part 2, section 8(a).

GRAZING SCHEDULE

The Annual stocking level (annual authorized livestock numbers and dates) are considered approximate. The actual dates and numbers may change due to many variables. Annual stocking level is based on current and expected forage production. The planned use period in a pasture and livestock numbers can/should be adjusted if conditions change, either (shortened or lengthened, depending on forage availability but not in excess of the permitted numbers and utilization in key areas).

*Any change from these Annual Operating Instructions is to be coordinated and confirmed in advance and will be made only with prior written Forest Service Officer Approval. (An Amendment)

*If emergency conditions require making an immediate change, notify the Forest Service Officer promptly.

Authorization

Upon payment of fees, the following is the planned grazing sequence for the winter grazing season:

Number of Livestock	Livestock Class	AUM factor	Pasture	Grazing period		Days	AUMs
175	Yearlings	0.7	Walker	11/15/2025	1/1/2026	47	192
175	Yearlings	0.7	Sheep Camp	1/2/2026	3/31/2026	88	513
175	Yearlings	0.7	Cowboy	4/1/2026	5/31/2026	60	350
Totals						195	1055

Rested (Ungrazed) Pastures: None

RESOURCE MONITORING

Allowable Use

The following is maximum allowable use:

Uplands: *On key grass species:* 40% of current year's growth. This percentage is of the total weight of the current year's production. *On key shrub species:* browsing of 50% of available leaders.

Riparian: *On key shrub species:* browsing of 20% of available leaders.

Cattle will be moved to the next scheduled pasture or off the allotment *when allowable use standards are met, no matter what the dates are on paper.* Failure to remove your cattle to

avoid use above the allowable levels is a violation of these instructions and the terms of your grazing permit.

The permittee is encouraged to participate in the allotment Monitoring process.

Actual Use

The permittee will document the following items on the enclosed Actual Use Form: 1) Pasture; 2) Actual Grazing Period; 3) Actual Livestock Numbers.

***It is very important that this Actual Use form be completed and submitted to your Rangeland Management Specialist at the end of the grazing year.**

RESOURCE OBJECTIVES for THIS GRAZING SEASON

Proper livestock management practices, e.g. distribution, timing of grazing, and intensity of grazing, must be managed closely to provide for plant maintenance, improved vigor, and maintenance/improvement of vegetative ground cover. When cattle are not in a pasture, ensure water is available for wildlife and escape ramps are in place on troughs.

SALTING AND PROTEIN BLOCK PRACTICES

Proper salt and protein block location can be a good tool to aid in livestock distribution, and they will be used in a manner to spread livestock utilization throughout the pasture. A detailed description of the Salting and Supplemental Feeding policy can be found in Part 3 of your term grazing permit; (See AMP and Term Grazing Permit for the complete list of the guidelines.) Place supplements to draw livestock to areas that normally receive only light use.

RANGE IMPROVEMENTS

Maintenance

Range improvements assigned to you are to be fully maintained annually to comply with permit requirements. Any maintenance you perform must conform to the standards specified by your District Rangeland Management Specialist. The grazing permittee is responsible for all maintenance materials, supplies and equipment necessary to properly maintain all range structural improvements. The Forest may replace range structural improvement materials and/or supplies at the end of the improvement's life if properly maintained; when maintenance and repair is no longer feasible to keep the improvement properly maintained and functioning.

Projects completed in the previous grazing season:

Cleaned Sheep Camp Spring

Projects ready for implementation:

Clean Cowboy Tank

Buried water line from private well to Cowboy Tank (if Cowboy Tank doesn't hold)

Buried water line from private well to Bull unit and drinker at existing storage tank

Projects awaiting clearance:

Trick Tank at Sheep Camp Trough water lot.

DROUGHT MANAGEMENT

To aide in determining the initial livestock numbers the Standard Precipitation Index (SPI) and the US Drought Monitor Report was discussed. The SPI and the US Drought Monitor showed our area in *Severe* drought status. It was agreed that due to current conditions that livestock number would be reduced to the amount showed in the grazing period table.

TRAVEL MANAGEMENT

The Prescott National Forest designated a system of roads and trails that are open to motor vehicle use in 1989 through Forest Plan Amendment #4. Motor vehicle use off the designated road system by the permit holder to conduct activities associated with administration of the term grazing permit is allowed under the terms and conditions of the term grazing permit.

PERMIT CONDITIONS

These Annual Operating Instructions are a part of the Term Grazing Permit as provided for in Part 2, Section 8(a). They comply with the standards and guidelines found in the Forest Plan. Failure to follow any of the terms and conditions specified in Parts 1, 2, and 3 of your Term Grazing Permit may result in suspension or cancellation, in whole or in part, after written notice (Refer to Part 1, Section 3, of your permit).
