

**V-Bar Allotment
2017 Annual Operating Instructions**

Resource Objectives for this Grazing Season

Perennial grasses and major browse species within these pastures need rest in order to provide time to recover from the drought we're currently experiencing. Keep livestock numbers low and move cattle when utilizations in pastures are met. Ensure wildlife water is available in pastures cattle are not in and wildlife escape ramps are in place on troughs.

Authorization

Upon payment of fees livestock are authorized as follows for 2017:

Number of Livestock	Pasture	Grazing Period (may be modified)
330 c/c	Vbars & Osbourne west	3/1-3/15
330 c/c	Osbourne Easts & Antelopes	3/16-5/15
90 c/c	Bull	5/10-5/15
30 Heifers	Creek	3/1-3/14
30 Heifers	Median S	5/11- 7/8
30 Heifers	Yarbo E&W	9/1-10/25
30 Heifers	Budweiser	11/10- 1/10/2018
30 Heifers	Creek	1/11- 2/28/2018
40 c/c	CGSE	3/1-10
40 c/c	CGNW	3/11-22
40 c/c	CGNE	3/23- 4/3
40 c/c	CGS	4/4-15
40 c/c	CGSW	4/16-27
40 c/c	Estler E	11/1 – 2/28/18
17 bulls	Bull	3/1-4/10
17 Bulls	Bull	9/3-11/1
10 bulls	Bull	11/1-1/5/18
17 Bulls	Bull	1/5-2/27/2018
400 C/C	Estler W	6/16-26
400 C/C	CGS	6/27-7/5
400 C/C	CGSE	7/6-12
400 C/C	CGNE	7/13-21
400 C/C	BCS	7/22-28
400 C/C	BCN	7/29-8/9
400 C/C	MED. N	8/10,11
400 C/C	MED S	8/12-21
400 C/C	CGNW	8/22-28
400 C/C	CGSW	8/28-9/2
400 C/C	SEC.20	9/3-9/9
400 C/C	YARBO E&W	10/15-1/10/18
400 C/C	VBARS & OSBOURNE W'S	1/11-2/28/18

The Forest Officer must be given actual use, by pasture, after livestock at the next annual authorization meeting. Any change from these Annual Operating Instructions is to be coordinated and confirmed in advance with the Forest Officer, best if a week or two in advance. If emergency conditions require making a change immediately, notify the Forest Officer promptly. Move your livestock regardless of the date shown above, to avoid exceeding allowable use (utilization) levels

Allowable Use

Although utilization is not applied for time control grazing the stress on grasses because of the drought makes it necessary to ensure adequate stubble for thermal protection. As was observed when we monitored the allotment the areas of higher use had greater plant mortality so we agreed to go with utilization until plant health is sufficient to allow a return to time control. The following is maximum allowable use: Uplands: *On palatable grasses*: 35% while actively growing, 50% during dormant periods. This percentage is of the total weight of the current year's production. *On shrubs*: browsing of 50% of available leaders. Riparian: *On palatable grasses and sedges*: 30% of the total weight available. *On shrubs*: browsing of 50% of available leaders.

Cattle will be moved to the next scheduled pasture when allowable use standards are met, no matter what the dates on paper are.

Salt And Supplements

The thoughtful placement of salt, mineral, and protein is a valuable distribution aid. Salt will not be located in heavy use areas, including within ¼ mile of water, except where paddock size restricts placement.

Permittee Comments And Suggestions

Travel management-

The Prescott National Forest designated a system of roads and trails that are open to motor vehicle use in 1989 through Forest Plan Amendment #4. Motor vehicle use off the designated road system by the permit holder to conduct activities associated with administration of the term grazing permit is allowed under the terms and conditions of the term grazing permit.

Permit Conditions

These Annual Operating Instructions are a part of the Term Grazing Permit as provided for in Part 2, Section 8(a). They comply with the standards and guidelines found in the Forest Plan. Failure to follow any of the terms and conditions specified in Parts 1, 2, and 3 of your Term Grazing Permit may result in suspension or cancellation, in whole or in part, after written notice. (Refer to Part 1, Section 3, of your permit.)
