and  
FINDING OF NO SIGNIFICANT IMPACT

V-Bar Allotment Management Plan  
Prescott National Forest

An Environmental Assessment that discusses a revision of the Allotment Management Plan for the V-Bar Allotment on the Verde Ranger District is available for public review at the Verde Ranger District Office in Camp Verde and the Prescott Forest Supervisor's Office in Prescott.

Based on the analysis and evaluation described in the Environmental Assessment it is my decision to adopt the alternative which provides for entering into a time control grazing program with an initial number of 400 cattle yearlong after completion of the Phase I developments. The other alternative considered was the current six pasture rotation management with 300 cattle yearlong.

I have determined that this action would not significantly affect the quality of the human environment; therefore, an Environmental Impact Statement is not needed.

Implementation of this action may take place immediately. This decision is subject to administrative review.
